Profile

I am a Computer Science student passionate about the intersection of software engineering and strategic project execution. While my foundation is built on hands-on full-stack development and AI implementation with proficiency in Python, C, C#, PHP, React, SQL, and workflow automation using n8n. I am increasingly drawn toward Business Analysis and Project Management. My technical portfolio includes engineering multi- Rag agentic architectures (BIWIZE), **publishing a indexed research benchmarking lightweight RAG systems**, and building real-world solutions like a university Smart App, Beauty care IoT devices (VISUM), air quality monitoring platforms, custom financial reporting systems (CLARAFI-BALLERINA), online movie ticket booking environments (Imperial Cinema), Next.js storefront integrations (Opulentia Furniture), and clothing retail web storefronts (MAISON-NEUF). I thrive on translating complex technical requirements into strategic roadmaps, managing software deliverables, and optimizing the development lifecycle. Combining deep technical expertise with leadership experience gained through collaborative committee roles, I am dedicated to driving innovative, problem-solving solutions from conception to deployment.

Education

BSc (Hons) Computer Science Plymouth University, UK	2023 - Present
Diploma In Informationa Tecnology ESOFT Metro Campus, Wattala	2022 - 2023
Advance Level (Cambridge) OKI International School, Wattala	2020 - 2022
Ordinary Level (Cambridge) OKI International School, Wattala	2018 - 2020

Research and Publications

Personalizing University Support: Benchmarking Lightweight RAG Systems Against Commercial LLMs in Higher Education Administration Conference: 2026 6th International Conference on Advanced Research in Computing (ICARC)	2026
---	------

Extracurricular activities

Assistant secretary IEEE NSBM Green University Student Branch, NSBM Green University, Homagama	2024 - 2025
Member IEEE NSBM Green University Student Branch, NSBM Green University, Homagama	2023 - 2025
Member NFORCE, NSBM Green University, Homagama	2023 - 2024

Skills

- Team Work
- Project Management
- Adaptability
- Technical Documentation

Member Buddhist Association, NSBM Green University, Homagama	2023 - 2024
Member Chess Club, OkI International, Wattala	2015 - 2020
Member Girl Guiding Association, OkI International, Wattala	2015 - 2020

Certificates

The Best Paper Of the Generative AI in Education Personalizing University Support: Benchmarking Lightweight RAG Systems Against Commercial LLMs in Higher Education Administration <i>(Conference: 2026 6th International Conference on Advanced Research in Computing (ICARC))</i>	2026
Certification Of Appreciation In Recognition Of Outstanding Contribution As Assistant secretary of IEEE Student Branch Of NSBM Green University	2026

Projects

BIWIZE AI platform specialized in Requirement Engineering for IT Business Analytics Utilizing a Multi RAG Agentic architecture Live Deployment: https://ba-lime.vercel.app/	2025 - 2026
OpulentiaFurniture A modern Next.js storefront demo with Firebase auth, product cart, and 3D product visualization.	2026 - 2026
Imperial Cinema A platform Built in Booking Tickets for Movies	2026 - 2026
Language Live Deployment: https://learn-ruddy.vercel.app	2025 - 2025
Portfllio	
VISUM Kiosk System that provides assistant to beauty care Responsible for developing Beauty Score UI and the System and the administrative system which provides the system condition, controls the device and user data using React and Python	2024 - 2025
Advance University App - Group Project Developed a full-stack mobile application and web application Responsible for developing the administrative web application University Direction Module (UniMap) in the mobile Application using React and Python	2024 - 2025
AirQualityMonitoring - Personal Project Developed a full-Stack Air Quality Monitoring System Developed a full-stack website using React for the frontend and C# for the backend	2024 - 2025
CLARAFI-BALLERINA - competition Developed system using ballerina that automatically generates comprehensive financial reports	2023 - 2024
MAISON-NEUF- Group Project Developed a Full- Stack Online Clothing Retail Website Responsible for developing and managing the backend using PHP with MySQL as the database.	2023 - 2024
